### Now score yourself

**Step 1:** Transfer the numbers from the quiz to the scorecard that follows by matching up the letters. For example, take the number you wrote for question A on the quiz and enter it on line A of the scorecard.

**Step 2:** Add each set of 3 scores on the scorecard to get the total for each different category. For example, to find your score on the “Stimulation” category, add together the scores for questions A, H and U.

The score for each category can range from a low of 3 to a high of 15. A score of 11 or above on any set is high and means that your smoking is probably influenced by that category. A score of 7 or below is low and means that this category is not a primary source of satisfaction to you when you smoke.
